

XULO

The whole school, in one place.

Admissions, fees, attendance, exams, payroll, transport, hostel and the returns to the board, on the office computer and on every parent's phone.

For the correspondent, the principal and the office. October 2026.

What a school gets

Four things, each one measurable in a term.

1

More fee money, sooner

Reminders go to families on a schedule the office sets once, by WhatsApp and SMS. The aging list has the parent's phone on every row. Post-dated cheques are tracked to clearance. Online payment sends the receipt back by itself.

2

One fewer clerk

Fee counter, payroll, books of account, GST receipts, tax filing and the Tally export are in the core product. The accountant never re-types a figure into a second system, and nothing is sold as a separate module.

3

No surprise at inspection

UDISE+, APAAR, the RTE register and staff training hours are kept as the year goes. A readiness page counts what is still missing today and names the screen it is filled on.

4

Fewer calls to the principal

Parents get the answer before they ask: attendance the same morning, homework in the diary, the receipt at once, leave decided in the app, and photo and video stories from the class.

And three more a school notices in the first week

Works with no signal. Attendance, diary and homework on a phone with no network, sent when it returns.

Twenty roles, each with its own home. Principal, HOD, exam controller, warden, nurse, counsellor, driver, trustee, IT admin: every person opens to their own work.

Help inside the product. Troubleshooters, screen sharing with a six-digit code, known issues with their workarounds. A small school needs no IT person.

What is inside

Every workspace, included. Nothing below is an add-on.

Admissions	Enquiries with an owner and a next call, enquiry links a family fills in on their phone, application forms and a form builder, document verification, RTE quota and lottery import, waitlist, sibling and referral reports, dropped-lead reasons, a counsellor's daily sheet.
Students	Student 360, class 360, photographs, groups and lists, class promotion, certificates (bonafide, character, study, promotion, achievement, transfer) one at a time or for a whole section, ID cards with a barcode, leavers and withdrawals.
Academics	Master timetable and substitutions, lesson plans, syllabus progress, curriculum roadmap, attendance with correction and follow-up, whole-school attendance, activities and electives, school calendar, year rollover.
Exams	Exams and papers, question paper approval, mark moderation, hall tickets and seating, report cards in the board's format, CCE, question bank, performance overview.
Fees	Fee counter and A4 receipts, fee structures by class, concessions with the paper behind them, wallets, online portal, reminders on a schedule, cheques to clearance, corrections (void, move, force, end a fee), and the fixed reports an accountant asks for by name.
Accounts and payroll	Chart of accounts, daybook, cashbook, ledger, trial balance, year-end close, vendor bills and petty cash, fixed assets and budgets, monthly payroll with PF and ESI, taxes and the taxation sheet, Tally connector.
Staff	Staff 360 and service book, hiring, performance reviews, training hours against the board's requirement, duty roster, biometric readers, working hours and loss of pay, leave with application windows, compensatory off and permissions, attendance regularisation, staff tasks and reporting managers, the staff handbook with acknowledgements.
Communication	Messages between office, teachers and parents, circulars with acknowledgements, Class Status photo and video stories with a family gallery, grievances routed with a deadline, WhatsApp, SMS and email with delivery receipts, quiet hours and a daily cap.
Transport	Vehicles and their papers, routes and stops with zones, student allocation, bus attendance, live tracking, geofence alerts to parents, speeding alerts, fuel and maintenance, the daily transport sheet.

Hostel, clinic, library, stores	Rooms, outpasses, mess, night study, visitors and laundry. Visits and medication, health records. Catalogue, accession register, issue and return, reservations, fines, reading levels. Stock and movements, store catalogue, canteen sales.
Parents and students	A phone-first portal: attendance, homework, timetable, results, fees and receipts, bus tracking with a proximity alert, leave, permission slips, certificate requests, the child's ID card, the school gallery. A student's own planner and LMS.
The board and the government	UDISE+ sync, APAAR provisioning, DigiLocker, board LOC, SQAA, state board configuration, instruction hours, returns readiness.
Running many schools	A seller console with plans, entitlements, usage, instance health and a support desk; each school white-labelled with its own colour, logo and app.

Against the usual choice

Checked screen by screen against MyClassBoard's own list of 402 screens, exported from a school's login on 7 October 2026.

	MyClassBoard	XULO
Of MCB's 402 screens	402	368 have the same, 12 partly, 22 left out on purpose (MPIN, hardware scan, switch zone and the like)
Payroll and books of account	HR Plus and accounting, sold separately	Included
Hostel, inventory, LMS	Separate priced modules	Included
School-branded app	A paid service	Included
Fee reminders	Reports; the office rings	Sent on a schedule the office sets once
Works offline	No	Attendance, diary and homework; sent when the network returns
Moving a school across	Not offered	A guided import of MCB's own exports, five files in order, in an afternoon
Returns to the board	APAAR cards	UDISE+, APAAR, DigiLocker, RTE, LOC, and a readiness count
Price	Quote only; modules priced separately	One per-student price with every workspace included, and per-message rates

What MCB has that XULO leaves out

A Lexile reading scale (XULO keeps whatever reading level the school uses), a map of student addresses (addresses are not geocoded), a principal's diary, and MCB's own account tools: MPIN, hardware scan, switch zone, help videos, scheduled trainings.

A school's year

A CBSE school of 800 in Hyderabad, moving off MyClassBoard. Every screen named is in the product today.

March, the week before The correspondent opens Getting started. Move from MyClassBoard lists five files in order: classes, students with parents, staff, fee structures, this year's receipts. The office downloads each from MCB, dry-runs it, fixes the eleven rows it names, imports. Parents get their logins from the same file. Receipt numbers stay as MCB printed them, so dues are right on day one. Rules is three sentences: remind families five days before a fee is due by WhatsApp, send the office the day's figures at six, nothing after nine at night. Returns readiness says 34 fields are missing for UDISE+ and names the screens; the office starts there, not in September.

April **Admissions**

A family taps an enquiry link on the school's WhatsApp status and fills it in on their phone. It lands under Enquiries with a counsellor as owner and a follow-up date. The campus visit is booked, the walk-in logged at the front desk with a pass, the application form built once in the form builder, documents verified against the list. A sibling already on the roll is matched. The RTE lottery list is imported and the seats filled. The waitlist moves on its own when a seat opens. Dropped leads carry a reason; the counsellor's daily sheet shows who was not called.

June **The year starts**

Year rollover promotes every section. Class setup, teacher assignment, the master timetable with substitutions, bell schedules, the calendar and holidays. The demand run raises the term's invoices and the first reminder goes out on schedule. Transport allocates each child to a stop with a zone; vehicle papers are checked against their expiry dates; the daily transport sheet prints at seven.

A Tuesday in July, 8:40 **The morning**

The gate reader marks staff. One teacher forgot to punch and asks on My leave for the day to be fixed; HR approves on the Staff register and the mark is written. At 9:05 class teachers take attendance on their phones, offline in the two classrooms with no signal, synced when they walk out. By 9:30 the parent of every absent child has a message. A parent applies leave for Friday in the app; it is in the register before the teacher reaches it. A teacher posts three photos from the science fair as a Class Status story; the family gallery fills by lunch.

Tuesday **The office**

The fee counter takes cash, a cheque dated next week and a UPI payment; each prints an A4 receipt at once and posts to the books by itself. The cheque sits on the cheque deposit dashboard until it clears. The accountant prints the bank pay-in slip. One receipt was taken against the wrong sibling; Fee corrections moves it with the reason on the record. The canteen terminal sells lunch coupons. A vendor bill goes to petty cash. The nurse logs an infirmary visit, the counsellor a family conversation.

Tuesday **The staff room**

Homework goes into the diary once and reaches every parent by evening. Lesson plans and syllabus progress are updated. The HOD hands a teacher a task with a due date; it shows under My tasks. A permission for two hours at the bank is applied for and approved by the reporting manager. The new handbook policy on phones in class is read and acknowledged; HR sees who has not signed.

September Exams	Question papers are set, sent for approval, moderated. Hall tickets and seating are issued for a whole section. Marks are entered, absentees flagged, report cards generated in the board's format and published to families. Achievement certificates for sports day are issued for the whole section in one press.
October Month end	Monthly payroll runs with loss of pay taken from the register, PF and ESI grouped, payslips published, the bank file downloaded. The daybook, cashbook, ledger and trial balance close the month; the GST and taxation sheet is ready for the auditor. Outstanding as at 30 September prints class by class and will not change when October's money comes in. The month-wise statement and the deposits register reach the correspondent in the evening digest.
November The returns	Returns readiness is down to four missing fields. UDISE+ syncs. APAAR IDs are provisioned, DigiLocker certificates issued. Staff training hours are checked against CBSE's fifty. The board LOC is validated and filed. Nothing is scrambled for.
January The buses	A bus runs late; parents at the next three stops are alerted when it enters the geofence, and the transport office watches it on the live map, which draws from the public basemap when the school's own tiles are down. A speeding alert goes to the manager. A permit that expires next month is already on the transport home.
February The people	Performance reviews run on the yearly cycle. A teacher resigns; the exit runs through department clearances and the settlement unlocks when the last one signs. The library runs its annual stock check, and reading levels show which children in Class 3 read below the band.
March Year end	Transfer certificates for the leaving batch are issued in bulk, skipping the two children who owe fees and naming them. Promotion certificates follow. The year closes in the books. The trustee opens Where the money goes and sees the year on one page.
Every day Underneath	Twenty roles each open to their own home. A grievance goes to the right person with a deadline. Circulars carry acknowledgements. The seller console watches every school's health and support queue; Quick Assist lets support see a screen with a six-digit code. The school's own colour and logo are on every screen and print.

Moving a school across

An afternoon, with the office at the keyboard.

1

Download five files from MyClassBoard

Classes and sections, students with their parents, staff, fee structures, and this year's receipts. The screen names the MCB menu each one lives under.

2

Dry run

Each file is read against MCB's own column names, already mapped. Every row that cannot be taken is named with the reason. Nothing is written.

3

Import

When the dry run is clean enough, one press. Parents get their logins from the same file. Receipt numbers stay as MCB printed them, so dues are right from the first day.

4

Set the rules once

Fee reminders before the due date, the evening digest to the office, quiet hours. One page, each rule a sentence with a switch.

What we ask of the school

One afternoon of the office's time for the move, with us on the phone.

The school's WhatsApp Business account so reminders and stories reach parents where they are. We set it up with you.

A term to measure what changed: fees collected by the due date, calls to the office, the time the returns took.

Price

One per-student price for the year, every workspace included, and per-message rates for SMS and WhatsApp. Ask for the sheet.
